In the Firing Line

A number of recent cases have again highlighted the financial and reputational damage that terminating staff incorrectly can have on a organisation.

At our next HR Discussion Group we will look at how to best manage the following situations/employees:

- > bullying complaints and workplace investigations;
- > underperforming employees; and
- > sick or injured employees.

We hope you will be able to join us as we explore the related cases in more depth and facilitate a discussion around your experiences to identify the key “do’s and don’ts” before termination.
